Oct 9, 2022

The website committee proposed changes to the Meetings and Districts pages at the August AWSC meeting and these have been implemented. These changes included removing the Area meeting list and individual district's meeting lists, and added links to the WSO meeting search pages.

MonsterInsights Lite with Google Analytics was installed in July to collect website statistics. It was installed to help provide information about the meetings/district pages and links, but there was not enough information collected at that time to be useful. This could be useful in the future.

Newcomer Information in both English and Spanish was added to the bottom of the Meetings page. These links can be sent to newcomers at online meetings in place of Welcome Packets.

The list of electronic groups registered in Iowa has been temporarily added to the Meeting page since these do not currently show up on the WSO list.
